

CRE Flood Graph Dashboard — Power BI Quick Start Guide

File: CRE_Flood_Graph_Dashboard.pbix

What's Included

This .pbix file contains a **fully configured** Power BI report with:

- **3 Report Pages** with 37 total visuals pre-configured
- **19 DAX Measures** (Total SF, Cumulative SF, Growth Rate YoY, MF metrics, etc.)
- **Complete Data Model** (4 tables, 2 relationships)
- **Custom CRE Flood Theme** (sector color coding applied)
- **All visual configurations** (maps, charts, cards, slicers, tables)

How to Open & Activate

1. **Open** CRE_Flood_Graph_Dashboard.pbix in Power BI Desktop (Windows)
2. **Import Data:** Go to **Home** → **Get Data** → **Text/CSV**
 - Navigate to PowerBI_Dashboard_Package/data/combined_pipeline.csv
 - Click **Load**
3. **Repeat** for sector_lookup.csv , city_lookup.csv , time_dimension.csv
4. **Set Data Types** in Power Query Editor:
 - latitude / longitude → Decimal Number
 - sqft , units , est_value_millions → Decimal Number
 - delivery_year , report_year → Whole Number
 - delivery_date → Date
5. **Create Relationships** in Model View:
 - combined_pipeline[sector] → sector_lookup[sector]
 - combined_pipeline[city] → city_lookup[city]
6. **Apply Theme:** View → Themes → Browse → Select CRE_Flood_Theme.json
7. **Create DAX Measures:** Copy from DAX_Measures.dax (Modeling → New Measure)

Page Layout Summary

Page	Visuals	Key Features
Executive Overview	16	KPI cards, bubble map, flood area chart, donut, slicers
Multifamily Deep-Dive	11	MF-filtered map, line chart, data table, status bar chart
Time Series Analysis	10	Annual trends, sector comparison, cumulative growth

Sector Color Coding

- Office: Blue (#2196F3)
- Retail: Orange (#FF9800)
- Multifamily: Green (#4CAF50)
- Hotel: Purple (#9C27B0)
- Industrial: Red (#F44336)
- Mixed-Use: Teal (#00BCD4)
