

Data Summary Report

CRE Flood Graph Dashboard — Complete Data Inventory

Total Records: 999
Cities: 2 (Washington DC, Atlanta)
Sectors: 7 (Office, Multifamily, Retail, Hotel, Other, Industrial, Mixed-Use)
Statuses: 3 (Completed, Under Construction, Pipeline)
Delivery Year Range: 2016–2033 (plus 160 records with no delivery year)

1. Projects by City

City	Records	% of Total	Data Type	Suitable for Presentations?
Washington, DC	719	72.0%	✔ REAL (WD-CEP Open Data DC)	✔ Yes
Atlanta	280	28.0%	● SYNTHETIC (generated for demo)	✗ No — label as “sample data”

2. Projects by Status

Overall

Status	Total	DC	Atlanta
Completed	322	236	86
Under Construction	341	242	99
Pipeline	336	241	95

Reliability Note

- **DC statuses are meaningful** — “Completed” means built, “Under Construction” means actively being built, “Pipeline” means planned/proposed
- **Atlanta statuses are randomly assigned** — Some Atlanta projects are marked “Completed” for future years (2026-2027), which is impossible

3. Projects by Sector

Sector	Total	DC	Atlanta
Multifamily	197	133	64
Retail	194	145	49
Hotel	191	150	41
Office	181	137	44
Other	158	119	39
Industrial	43	0	43
Mixed-Use	35	0	35

Note: DC has zero Industrial and Mixed-Use records. These sectors exist only in the Atlanta synthetic data. The WDCEP reports do not use these sector categories.

4. Projects by Delivery Year

Year	Total	DC	Atlanta	Data Quality
2016	1	1	0	● DC Real (historical)
2017	23	23	0	● DC Real (historical)
2018	86	64	22	● DC Real / ● ATL Synthetic
2019	124	95	29	● DC Real / ● ATL Synthetic
2020	110	88	22	● DC Real / ● ATL Synthetic
2021	73	52	21	● DC Real / ● ATL Synthetic
2022	100	64	36	● DC Real / ● ATL Synthetic
2023	58	30	28	● DC Real / ● ATL Synthetic
2024	77	58	19	● DC Real / ● ATL Synthetic
2025	77	42	35	● DC Real / ● ATL Synthetic
2026	54	12	42	● DC Pipeline/ UC / ● ATL Synthetic
2027	41	16	25	● DC Pipeline/ UC / ● ATL Synthetic
2028	6	6	0	● DC Pipeline
2029	3	3	0	● DC Pipeline/ UC
2030	5	5	0	● DC Pipeline
2033	1	1	0	● DC Pipeline

Year	Total	DC	Atlanta	Data Quality
Unknown	160	160	0	🟡 DC Pipeline (no timeline yet)

5. DC Future Years (2026-2033) — Detailed Breakdown

These are **real planned projects**, NOT forecasts. All are appropriately marked as Under Construction or Pipeline:

Year	Under Construction	Pipeline	Total	Example Projects
2026	10	2	12	MacArthur HS, 1125 15th St, Smithsonian Air & Space, 1776 K St
2027	3	13	16	CISA HQ, Capital One Arena, National Museum US Navy, East River Park
2028	0	6	6	725 12th St, The Geneva, The Bridge District Phase II, Daniel Tsai Hall
2029	2	1	3	Reservoir District, Navy Yard Parcel O
2030	0	5	5	2000 14th St, Martin’s View, 850 South Capitol
2033	0	1	1	Reservation 13 Bundle 1

Key takeaway: Zero DC projects in 2026+ are marked “Completed” — this is logically correct and confirms data integrity.

6. DC Report Year Vintages

The DC data comes from three distinct WDCEP report snapshots:

Report Year	Records	Coverage Period
2019	425	Projects tracked as of 2019 (delivery years 2017-2023+)
2021	149	Mid-cycle update
2025	145	Most current data (delivery years 2024-2033)

⚠️ Duplication Warning: Some projects appear in multiple report years. For example, a project that was “Pipeline” in 2019 may appear again as “Completed” in 2025. The 719 DC records do NOT represent 719 unique projects.

7. Real vs. Synthetic — Clear Classification

✓ USE FOR REAL ANALYSIS / PRESENTATIONS

Data Segment	Records	Why It’s Reliable
DC Completed (2024 & earlier)	~186	Verified built projects with real names, addresses, developers
DC Under Construction (2025 report)	~90	Active construction with known developers and timelines
DC Pipeline (2025 report)	~55	Real proposed projects from WDCEP tracking
DC Historical (2019/2021 reports)	~574	Historical record of DC development pipeline

⚠️ USE WITH CAVEATS

Data Segment	Records	Caveat
DC Pipeline (2028-2033)	~13	Far-future timelines are highly tentative
DC records with no delivery year	160	Early-stage pipeline — no timeline established

● DO NOT USE FOR REAL ANALYSIS — REPLACE FOR PRODUCTION

Data Segment	Records	Why It's Not Reliable
Atlanta — ALL records	280	Entirely synthetic; coded names like "ATL-Ind-001"
Atlanta "Completed" 2026-2027	19	Logically impossible (future dates marked complete)

8. Recommendations for Next Steps

For Immediate Use (Prototype/Demo)

- ✓ Present DC data as real market intelligence
- ✓ Use Atlanta data to demonstrate multi-city features
- ⚠ Add a "SAMPLE DATA" disclaimer when showing Atlanta
- ⚠ Caveat DC future years as "planned/proposed, subject to change"

For Production Readiness

1. **Replace Atlanta data** with real CRE pipeline data from:
 - Atlanta Regional Commission
 - Invest Atlanta / Atlanta BeltLine Inc.
 - CoStar Group or similar commercial data provider
2. **Deduplicate DC records** across report years to get true unique project counts
3. **Add data freshness metadata** — Show when each record was last verified
4. **Add a "data quality" column** to the CSV indicating:
 - `verified` — Completed projects with confirmed details
 - `active` — Under construction with known timeline
 - `tentative` — Pipeline with estimated timeline
 - `early_stage` — Pipeline with no timeline
 - `synthetic` — Demo/sample data
5. **Consider additional cities** — The dashboard framework supports unlimited cities. Real data from markets like New York, Boston, Charlotte, or Nashville would make compelling additions.
